– The MAILING DATE of this communication appears on the cover sheet with the correspondence address –  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM  
THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 43, 44, 47 are rejected under 35 U.S.C. 103(a) as being unpatentable over by Evans et al (6,322,499) in view of Hips (6,228,025). Evans shows an illuminated retractor comprising a handle member 20 having a first handle member end portion 22 and a second handle member end portion 24, and a first elongate section 30 having proximal and distal end portions 34, 32 and a first inner surface 38 extending from the proximal end portion to near the distal end portion wherein the second handle member end portion is connected to the first elongate section by a twist connector and forms an acute angle therebetween (col. 7, lines 57-61). The second handle member end portion is pivotally connected to the first elongate member (col. 8, lines 59-60). The retractor also includes a second elongate section 40 having proximal and distal end portions and a second inner surface 48 extending between the ends. The second elongate section is connected to the first elongate section such that the sections are substantially aligned. The distal end portion of the second elongate section defines an illuminating output member 49. The proximal end portion of the first elongate section

has an insertion area 39 for receipt of a portion of the second elongate section. As to claim 47, the insertion area 47 is formed as a U-shaped flap. The illumination input end 49 is coupled to the optical cable 27 through the twist connector. The first elongate inner surface does not have a non-linear (or bent) shape. Hipps shows a retractor having a first elongate section 30 having an inner surface 38 having a curved (bent) shape (see Figure 2B) to prevent trauma to the tissue. It would have been obvious to one of ordinary skill in the art at the time the invention was made to form the inner surface of Evans to have a curved (non-linear) shape, as taught by Hipps, in order to prevent trauma to the tissue.

#### ***Allowable Subject Matter***

Claims 1-42 and 48 are allowed.

Claims 45, 46 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Response to Arguments***

Applicant's arguments filed April 23, 2004 have been fully considered but they are not persuasive. Applicant does not include any arguments with respect to claims 43, 44 and 47.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
